

Cassadaga Wind Project

Case No. 14-F-0490

1001.39 Exhibit 39

Wastewater Interconnection

EXHIBIT 39 WASTEWATER INTERCONNECTION

The proposed Facility is not expected to require wastewater interconnection, and as such, the requirements of this exhibit are not applicable. Specific to the O&M building, if a new building is constructed wastewater needs will be satisfied through use of an individual on-site wastewater treatment system (e.g., septic system). The Applicant will work with the Chautauqua County Department of Health throughout this process. If an existing building is used for O&M purposes, the Applicant will evaluate the adequacy of existing wastewater treatment systems.
