

Baron Winds Project

Case No. 15-F-0122

1001.39 Exhibit 39

Wastewater Interconnection

EXHIBIT 39 WASTEWATER INTERCONNECTION

The proposed Facility is not expected to require wastewater interconnection. As a result, the requirements of this Exhibit are not applicable to the Facility. If a new operation and maintenance (O&M) building is constructed to support the Facility, its wastewater needs will be satisfied through use of an individual on-site wastewater treatment system (e.g., septic system). The system will be constructed in accordance with the standards set forth in 10 NYCRR Part 75, Standards for Individual Onsite Wastewater Treatment Systems. If an existing building is used for O&M purposes, the Applicant will evaluate the adequacy of any existing wastewater treatment system and install a new system, if necessary.
